

INSTRUCTIONS

Sconce 2 rotating arms, 1 straight, 1 curved

1. Unpack without using any cutter or scissor because of possible scratches. Release the packaging of reflectors without removing it completely.

2. Unscrew carefully the 4 screws to remove the back of the square housing.

3. Fix the square plate to the wall, respecting the verticality of the lamp.

4. Fix the lower curved tube into the central tube. Screw the hexagonal brass screw without tighten it otherwise painting could be damaged.

5. Fix the upper big curved tube into the central tube. Fix the upper straight tube into the big curved tube then screw the hexagonal brass screw at the fitting.

6. At this stage, at least 2 operators are necessary. One maintains the lamp, second operator connects electrical wires, then fit the square housing into the square plate on the wall. Then screw the 4 screws.

7. Remove completely the packaging.

8. Before moving the lower arm, the screw must not be tightened otherwise painting could be damaged.
