

INSTRUCTIONS

Sconce 3 rotating straight arms

1. Unpack without using any cutter or scissor because of possible scratches. Release the packaging of reflectors without removing it completely.

2. Unscrew carefully the 4 screws to remove the back of the rectangular housing.

3. Fix the rectangular plate to the wall, respecting the verticality of the lamp.

4. Fix the lower curved tube into the central tube. Screw the hexagonal brass screw without tighten it otherwise painting could be damaged.

5. Fix the upper big curved tubes into the central tubes. Fix the upper straight tubes into the big curved tubes then screw the hexagonal brass screws at the fitting.

6. At this stage, at least 2 operators are necessary. One maintains the lamp, second operator connects electrical wires, then fit the rectangular housing into the rectangular plate on the wall. Then screw the 4 screws.

7. Remove completely the packaging.

8. Before moving the arms, the screw must not be tightened otherwise painting could be damaged.
